

VITREUM

total solution

An abstract, futuristic image featuring a tunnel of blue light. The light rays curve and converge towards a bright horizon, creating a sense of depth and motion. The overall color palette is various shades of blue, from deep navy to bright cyan.

O NAMA

Kompanija Vitreum osnovana je 2005. godine sa idejom da klijentima omogući konkretna i efikasna rešenja i usluge iz oblasti instalacija slabe struje. Uspostavljamo integrisane elektronske sisteme zaštite za sve tipove objekata, kontrolu pristupa lica i video nadzor do ranog otkrivanja požara ili toksičnih gasova.

Kombinovanjem najmodernije tehnologije, sopstvenog iskustva i idejnih rešenja koja su u potpunosti prilagođena individualnim karakteristikama objekta, Vitreum omogućuje svojim klijentima da optimizuju investiciju i umanje troškove održavanja. Nudimo kompletnu uslugu od projektovanja, ugradnje, ispitivanja, logističke podrške i održavanja sistema zaštite tokom celokupnog upotrebnog veka objekta.

ABOUT US

Vitreum company established in 2005 with the idea to provide to customers concrete and effective solutions and services in the field of low voltage installations. We create integrated electronic security systems for all types of buildings, access control and video surveillance to the early detection of fire or toxic gases.

Combining cutting-edge technology, personal experience and design solutions that are tailored to the individual characteristics of the object, Vitreum allows its customers to optimize investment and reduce maintenance costs. We offer a complete service from design, installation, testing, logistics matters and maintenance of the entire system of care throughout the service life of the building.

VITREUM

Razvoj

Logičan razvoj kompanije prvo kreće sa ugradnjom alarmnih sistema, da bi se 2007. godine počelo sa ugradnjom ostalih sistema tehničke zaštite, strukturnim kablovskim sistemima i optičkim sistemima.

Proširili smo delatnost i na oblast jake struje, elektroenergetske instalacije i opremu, a od 2008. godine sa kompanijom Simens uvodimo integrisane inteligentne sigurnosne sisteme za upravljanje (pametne zgrade i hotelska automatika/sistemi).

Rezultati kvalitetnog rada, poštovanja želja i zahteva klijenata, naročito putem preporuka, doveli su do ubrzanog razvoja kompanije Vitreum što je rezultiralo i proširenjem poslovnih aktivnosti na tržištima Srbije, Crne Gore i Republike Srpske, gde imamo firme.

Danas je u kompaniji zaposleno 30 visokobrazovanih i stručnih kadrova, od toga 9 inženjera i 16 tehničara zaduženo je za projektovanje i izvođenje radova. Stalna edukacija zaposlenih jedan je od primarnih ciljeva, kao i prenos znanja o aktuelnim inovacijama projektantima, investitorima i svim učesnicima u izgradnji i održavanju poslovnih objekata.

Development

The logical development of the company was start with the installation of alarm systems, led to 2007 when we began with the installation of security systems, structured cable systems and optical systems.

We have expanded our business to the area of high voltage, power supply installations and equipment, since 2008 with Company Simens we introduced the integrated intelligent security management systems (smart buildings and hotel automation / systems).

The results of quality work, respect for clients wishes and demands, particularly through recommendations, led to the rapid development of the company Vitreum which resulted in the expansion of business activities in the markets of Serbia, Montenegro and the Serbian Republic.

Today the company employs 30 highly educated and skilled personnel; 9 engineers and 16 technicians are in charge of design and construction. Ongoing education of employees is one of the primary goals, and the transfer of knowledge about current innovations to designers, investors and all stakeholders in the construction and maintenance of commercial buildings.

Politika kvaliteta

Osnovni cilj kompanije Vitreum je postizanje vrhunskog kvaliteta u pružanju usluga potrebnih za realizaciju kako standardnih tako i velikih projekata. Svočuvajući se sa sve zahtevnijim tehničko/komercijalnim uslovima na tržištu, u nameri da ojačamo svoju konkurentsku poziciju i da svojim klijentima garantujemo najviši kvalitet opreme, radova i usluga, kompanija VITREUM opredelila se za uspostavljanje efektivnog i efikasnog sistema upravljanja kvalitetom prema zahtevima međunarodnog standarda ISO 9001:2008.

Naše poslovanje baziramo na sledećim principima:

- Ugradnja kvalitetne i proverene opreme, kao i kvalitetno izvođenje radova i održavanje objekata u garantnom i van garantnog roka.
- Unapređenje profesionalnog znanja i kompetentnosti zaposlenih u svim oblastima poslovanja, razvijanje svesti o važnosti posla koji obavljaju i načinu na koji doprinose razvoju celokupne kompanije
- Ostvarivanje i neprestano razvijanje dobrih partnerskih odnosa sa dobavljačima i klijentima kroz obostranu razmenu znanja i iskustva

Poseđujemo SME sertifikat koji dodeljuje Privredna komora Srbije kao znak pouzdanosti i pozitivnog poslovanja

Quality Policy

The main objective of the company is Vitreum excellence in the provision of services required for the implementation of both standard and large projects. Facing an increasingly demanding technical / commercial market conditions, in order to strengthen its competitive position and to guarantee its customers the highest quality equipment, supplies and services, the company Vitreum opted to establish an effective and efficient quality management system according to international standard ISO 9001 : 2008.

Our business is based on the following principles:

- Installation of high quality and proven equipment and high-quality construction and building maintenance during the warranty and post-warranty period.
- Improving the professional knowledge and competence of staff in all areas of business, raising awareness of the importance of their work and the way in contributing to the development of the whole company
- Achieving and continually developing good partnerships with suppliers and customers through mutual exchange of knowledge and experience

We are SME certificate awarded by the Chamber of Commerce of Serbia as a sign of business confidence and positive revenue.

VITREUM

Delatnost

Naš projektni tim Vam stoji na raspolaganju za pružanje saveta u odabiru neophodnih sistema za postojeći ili novi objekat kako bi Vaša odluka sigurno obuhvatila sadašnje i buduće potrebe, kao i zakonske regulative. Pri projektovanju vodimo računa o optimizaciji sistema kako bi umanjili troškove osnovne investicije i operativne troškove u eksploataciji objekta. Izvodimo instalacije slabih i jakih struje, implementiramo i integrišemo neophodnu opremu na najzahtevnijim objektima zbog čega nam je poverenje ukazao veliki broj klijenata.

Usluge koje kompanija Vitreum nudi na tržištu su projektovanje, montaža, servisiranje i održavanje sledećih sistema:

- Protivprovalni alarmni sistemi
- Sistem video nadzora
- Sisteme kontrole pristupa
- Sistem prijave požara
- Sisteme detekcije opasnih gasova
- Telekomunikacioni sistemi
- Sistem računarskih mreža
- Otvučenje
- Multimedijalni sistemi
- Hotelski sistemi
- Garažni sistem
- Pametna zgrada
- Sistemi jakih struje

Kompanija Vitreum omogućuje Vam sigurnost i komfor u prostorima i objektima različitih namena: poslovni prostori, upravne zgrade, hoteli, bolnice, kulturni i sportski objekti, industrijski objekti, aerodromi i tuneli. Tokom eksploatacije sistema, odnosno tokom garantnog i vangarantnog perioda, pružamo potrebnu podršku pri održavanju sistema u obimu i načinu koji je komplementaran sa tehničkim mogućnostima objekta.

Activity

Our design team is available to provide advice in selecting the necessary systems for existing or new facility to make sure your decision included current and future needs, as well as legislation. In the design we take into account the optimization of the system to minimize the cost of basic investment and operating costs of the works. We carry out installations of low and high current systems, implement and integrate the necessary equipment in the most demanding facilities for which we have attracted a large number of clients.

Services that the company offers to the market are the design, installation, servicing and maintenance of the following systems:

- Anti-theft alarm system
- Video Surveillance
- Access control systems
- Fire Detection System
- Gas Detection Systems
- Telecommunication systems
- Computer networks
- Ambient sound
- Multimedia Systems
- Hotel Automation
- Garage management
- Smart building
- High voltage systems

Company Vitreum allow you the security and comfort of the rooms and buildings for various purposes: offices, administrative buildings, hotels, hospitals, cultural and sports facilities, industrial facilities, airports and tunnels. During the exploitation of the system, ie, during the warranty period and after that, we provide the necessary support for the maintenance of the extent and manner that is complementary to the technical ability of the object.

VITREUM

CROWNE PLAZA

HOTELS & RESORTS

Crowne Plaza, Beograd, Srbija

hotel u Beogradu, 417 soba. Instalacija sistema za dojavu požara, sistema za detekciju gasa, alarmni sistem, strukturni kablovski sistem, RTV instalacija, ozvučenje, sistem IP video nadzora; sistem žične i bežične telefonske mreže, sistem kontrole pristupa, sistem obilaska čuvarskih službi i sobna automatika

Crowne Plaza, Belgrade, Serbia

hotel in Belgrade, 417 rooms. Fire alarm system, gas detection system, intrusion alarm system, structured cable system, broadcasting installations, sound system, IP video surveillance; wireless and wired telephone network systems, access control system, guard system and hotel room automation

ATLAS CAPITAL *Centar*

Ambasada Ujedinjenih Emirata

protivpožarni sistem, multifunkcionalni alarmni sistem, sistem za kontrolu pristupa, sistem IP video nadzora, sistem video interfona, strukturalni kablovski sistem, sistem ozvučenja, metal detektor i rendgen za stvari

Embassy of United Emirates

fire alarm system, multifunctional alarm system, access control, IP video surveillance systems, video intercom system, structured cabling system, sound system, metal detector and X rays for bags

Atlas Capital Centar, Podgorica,

96.000 m² (protivpožarni sistem, multifunkcionalni alarmni sistem, sistem za kontrolu pristupa, sistem IP video nadzora, video interfona, strukturalni kablovski sistem, RTV instalacija, sistem ozvučenja, sistem za detekciju gasa, sistem pametne garaže, kontrolni centar; trafostanica)

Atlas Capital Centre, Podgorica, Montenegro

96.000 m² - fire alarm system, multifunctional alarm system, access control, IP video surveillance systems, video intercom system, structured cabling system, broadcasting installations, sound system, gas detection system, smart garage system and monitoring centre; power transformer)
